

# PARENTS' CAMPAIGN

Better Schools  Brighter Future

Each year Mississippi legislators pass laws that affect the quality of education public school children receive, including the level at which schools are funded. Often parents are unaware of how their local legislators are voting on these issues.

The Parents' Campaign, a nonprofit, grassroots organization that works to ensure a quality education for all Mississippi children, was founded in 2006 to provide parents information about initiatives that affect their children's education and a means by which to participate in this process. We hope you will join us! The Parents' Campaign will tell you who your legislators are and how to contact them, will tell you when education-related legislation is proposed and the effect that legislation will have on your school district, and will tell you how your legislators vote on those issues. We are not affiliated with any political party, nor are we affiliated with any professional educational organizations.
